

9 April 1954

MEMORANDUM FOR: The Acting Deputy Director (Administration)

SUBJECT: Report of Activities - Period Ending 8 April 1954

1. The Reproduction Plant due to high priority OCI work has been delayed in the production of regulatory issuances during the past week. These delays were not serious in that extensions of only three and four days were required. The Reproduction Plant is continuing to produce, in a very commendable way, regulatory issuance requirements.

2. Representatives of Logistics, Security, and Management Staff are jointly working on a solution to the problem of safeguarding Agency regulatory issuances.

3. The Office of Personnel has notified us that an agreement has been reached with General Cabell on Regulation No.  Separation by deleting the paragraph which he questioned. This Regulation will be resubmitted for authentication. STATINTL

4. Enclosure 1. shows the status of regulatory issuances submitted for authentication as well as an analysis of those publications that are still being processed by this Staff.

STATINTL

Chief, Regulations Control Staff

Enclosure - 1
